

Typo Detection

題目描述

請使用 Flex 實作一個簡易的 typo detection tool，可以偵測出輸入中 keyword 的 typo。

輸入格式

輸入只會包含以下元素：

- KEYWORD
 - 包含：WORD, KEY。
 - 可能會有一個字元打錯成小寫或其他英文字母（僅「替換一個字元」）。
- STR
 - 以雙引號包圍的字串。
 - 字串必定在單行之中。
- CAPSLOCK
 - 包含：CAPSLOCK。
 - 會將該行後續之 INPUT 轉為大寫，該行只會出現一次 CAPSLOCK，且只對該行進行轉換。
- SPACE
 - 包含：\t, \n, 。

同時保證輸入符合以下限制：

- 每行不超過 100 個字元。
- 輸入不超過 20 行且沒有空白行。

輸出格式

1. 如果不存在 typo，輸出：

No typo.

2. 否則依出現順序輸出：

In line {line number}, '{KEYWORD}' was not declared in this scope; did you mean 'KEY'?

或：

In line {line number}, '{KEYWORD}' was not declared in this scope; did you mean 'WORD'?

其中 line number 為該 KEYWORD 出現的行數。

注意：STRING 裡的 typo 不需處理。

公開測試資料

#	Input	Output
1	WORD KEY KEY KEY WORD WORD	No typo.
2	KAY WORD KEY KEY KEY WORDd	In line 1, 'KAY' was not declared in this scope; did you mean 'KEY'? In line 4, 'WORDd' was not declared in this scope; did you mean 'WORD'?

3	<pre>KEY "KAY" " WORD " CAPSLOCK kay wOrd CAPSLOCK word WORD keY " KOY KEY" WOrD</pre>	<pre>In line 2, 'KAY' was not declared in this scope; did you mean 'KEY'? In line 4, 'WOrD' was not declared in this scope; did you mean 'WORD'?</pre>
4	<pre>CAPSLOCK word wgrD kee "This is string. CAPSLOCK word KAY" WoRD aORD "Don't Trust Longest Match!"</pre>	<pre>In line 1, 'WGRD' was not declared in this scope; did you mean 'WORD'? In line 1, 'KEE' was not declared in this scope; did you mean 'KEY'? In line 3, 'WoRD' was not declared in this scope; did you mean 'WORD'? In line 3, 'aORD' was not declared in this scope; did you mean 'WORD'?</pre>
